graduate to work with it.

9. PROBLEM ROOT CAUSE

7. BEHAVIOUR

The reason for the arrival of this project is to keep and monitor the water used for multiple purpose especially for drinking purpose. We took this project to make the biggest change in society and breakthe myth of utilization of technologies.

Directly related: find better network availability, calculate the quality and quantity of water.

Indirectly related: customers spend free time on making awareness of the system to others.

3. TRIGGERS

paid.

10. YOUR SOLUTION

- We provide a good source to thepublic and we work based on publicreview.
- The PH level of water is identified.
- Turbidity of water is identified.
- Conductivity of water is identified.

8. CHANNELS OF BEHAVIOUR

ONLINE:

- public may provide review andrating for the system.
- The software used should be properly studied by everyone to operate it.
- The software and hardware connections should be given properly.

 But, in case of using mobile app the maintenance cost can be avoided and we can be able to monitor the parameters.

4.EMOTIONS: BEFORE / AFTER BEFORE:

- \mathbf{EM}
- Before implementing this project people feel it difficult to enjoy boating fishing and provision of safe drinking.
- They also face major problems in the development of industrial, hydroelectric and agricultural water requirements.

AFTER:

• After implementing this project people can be able to face all these above-mentioned problems easily

- Temperature of water is always monitored.
- Amount of oxygen dissolved in the water.
- TDS are used to describe the salinity level of water.
- Monthly report of maintaining the water will be displayed.

OFFLINE:

- Public supply funds to develop the system and make the system to take a next move.
- The hardware setup should be installed properly.
